**We are in a new era for schools across the globe. Everyone is trying to find the best format for teaching/learning online. Whether it's because of the pandemic related lockdowns or because it's the wave of the future, the time is now to find a solution that addresses the needs of what it means to be in school.**

For Students: being in school means being able to watch lectures from teachers, interact with them and classmates instantly, being able to submit assignments directly to the teacher, easily taking tests and receiving scores.

For Teachers: being in school means being able to teach/lecture, interact with students, administer and grade tests and assignments as well as being able to lesson plan and keep all classwork easily organized.

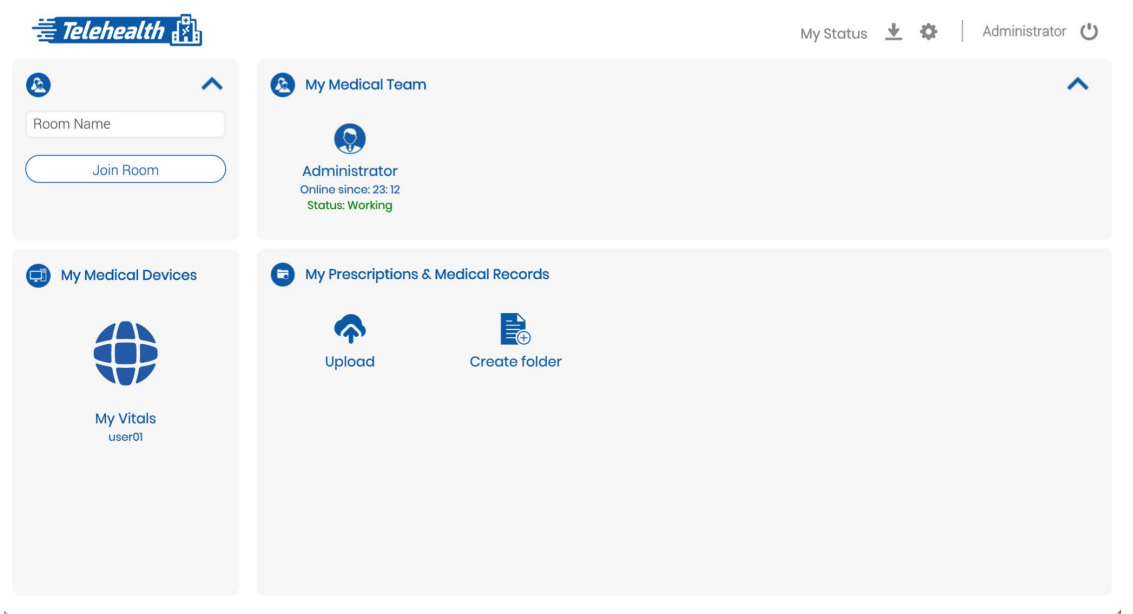

**Telescholar is for every school, student and teacher. We address each concern that we've received from school administrators, teachers and students to make an optimal online learning platform.**

**KEY FEATURES:**

**Class and Student Management**

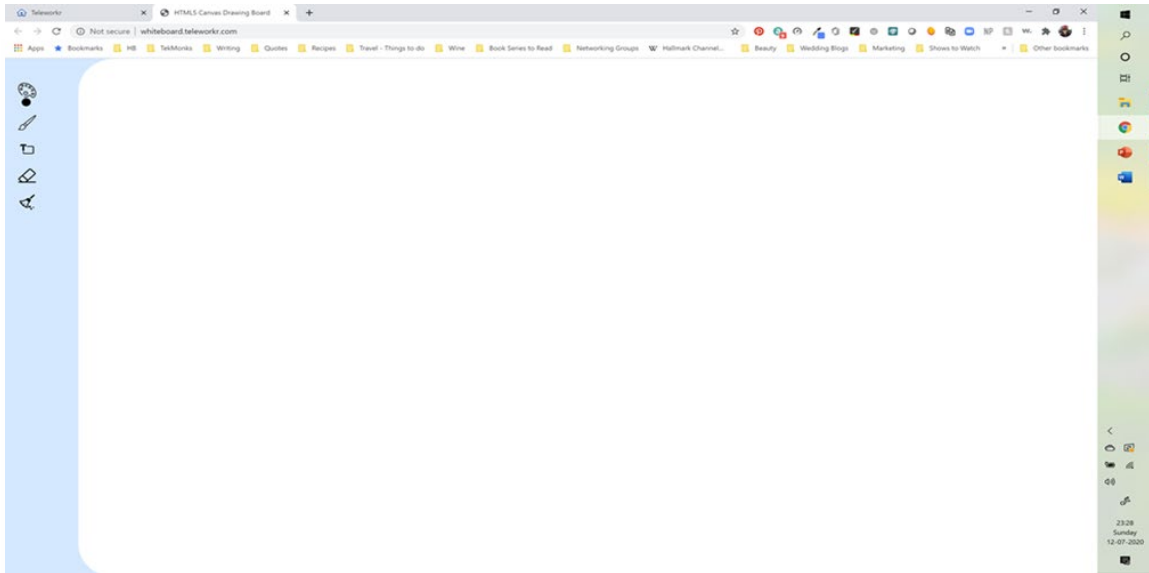

- Real time view with logs of study times, break times, class, etc. Ensuring that students are actually managing their classes as per the defined timetable or not depending on the format and requirements of the school and teacher.
- Identification of loopholes to monitor whether the students are actually studying and attending classes in a disciplined manner or if they are doing something else during scheduled class times

### White Board Feature

- Virtual Whiteboard with the ability to save the whiteboard drawings/text in the folders.

### Assignments and Testing

- Students are able to view their own folder in which they can also upload all assignments
- My Dashboard view for students and teachers to review and maintain folders for each class
- Administrative Control for managing access rights

### Group Assignments/Study Groups

- Screenshare and screenshot capability
- Video & audio recording capabilities of classes and/or sessions
- Fully-Secured environment with no risk for any outsider or hacker to be able to join in
- Secured URL for classes and a feature to create a public URL allowing anyone with the link to participate
- Real time attendance monitoring with red, yellow and green indicators, allowing teachers and classmates to see who is active or inactive during sessions

### Campus Hiring & Drives

- Different panels can be created conducting Interviews
- This opens up the ability to host a wide range of digital campus drives and competitions.

### Student Database Management for Placement Purpose

- Resume Database of Students/candidates for Employers to be able to access for recruitment and campus drive activities.

### Distance Management

- Multi Location Support
- Real time monitoring and time logs for faculty and other employees.

THANK YOU!
