

Teleworkr

Teleworkr

How it works and benefits

1

Security

No ports opened in the corporate firewall, no risk. As no one can access the desktops. This is the advantage of using reflection.

2

MFA

Teleworkr supports trust based multi-factor authentication for logins. This means users logging in from home are strongly authenticated, further ensuring those that are logging in are truly authorized to access.

3

MFA

Teleworkr supports trust based multi-factor authentication for logins. This means users logging in from home are strongly authenticated, further ensuring those that are logging in are truly authorized to access.

4

MFA

Teleworkr's admin console allows companies to centrally manage the users who have access and those who do not.

5

RDP PROTOCOLS

Teleworkr uses RDP protocol under the covers. It is 100% compatible with Windows OS, this is not some proprietary protocol. RDP is sent over a fully encrypted tunnel using our reflection technology. Again, this does not allow anyone to access what they are not preauthorized.

6

NO ADDITIONAL LICENSING

No need for additional licensing as each Windows license includes 2 RDP licenses for free.

Simple Installation

Just install the Teleworkr Agent on the user's desktops via a central push or the user's can self install. No need to modify the corporate network.

Vision

To continue bringing cutting edge solutions and impeccable service to our global clients.

Mission

To be a reputable Global Corporation providing quality solutions for business issues using technology and highly skilled people.

Values

We were founded on three main principles:

- 1 To have a single minded focus on solutions & service.
- 2 To always be forward thinking.
- 3 To provide solutions and services at a reasonable cost to our clients.
