

API 400

AS/400 MEETS THE FOUNTAIN OF YOUTH

We are in an era of digital disruptions

Where fast moving startups are dislodging established companies. These are dangerous times for mature companies, especially, when the core business is running on a legacy system such as the AS/400. A system which would be costly, high risk and time consuming to change.

The Current Digital Disruption

- Facebook, the world's most popular media owner, creates no content.
- Uber, the world's largest taxi company, owns no vehicles.
- Alibaba, the most valuable sales broker, has no inventory.
- And Airbnb, the world's largest accommodation provider, owns no real estate

In 2016, Digital businesses were seen as a real disruptive threat, and many major companies were ramping up to either compete or start their own Digital Offerings.

In 2019, it's either be completely immersed in the digital economy or fade away.

What can we do to become more effective in the current digital landscape?

Companies need a solution available at a lower cost than changing the whole system which is fully integrated with COBOL/batch systems, while still mitigating the risk, and as a bonus is IBM approved.

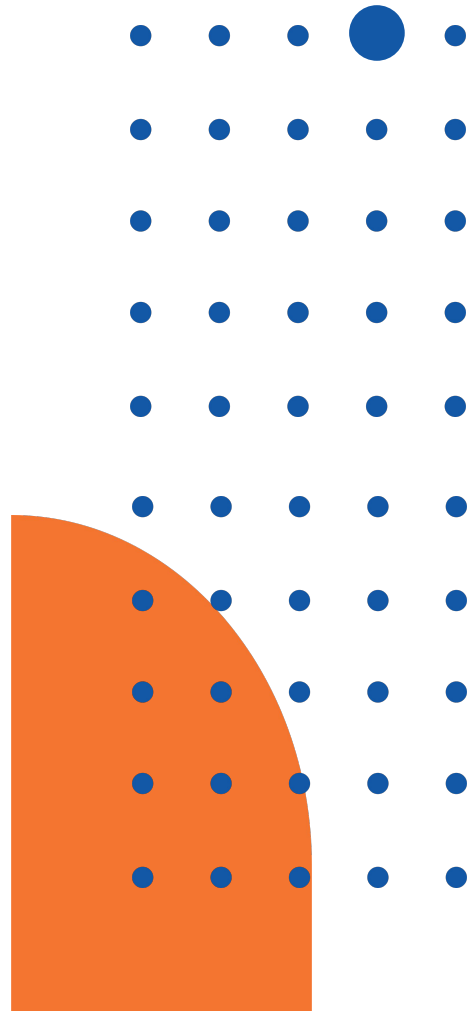

What is this API/400 product we speak of?

API/400 provides a single common gateway for REST based API calls to reach AS/400 business assets and data on the AS/400.

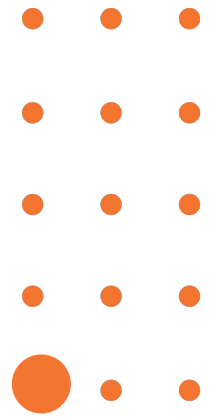

TekMonks' API/400 product allows creating API based services quickly. Capability is provided to directly expose as APIs, Mobile, Desktop and Web Applications

- 1 RPG, COBOL, CL Programs
- 2 DB/400 data
- 3 Physical Files
- 4 Data Files
- 5 Data Queues

Best of all, there's no screen scrapping! API400 provides a very high performance native solution that scales and evolves.

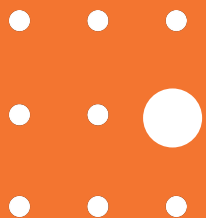

Immediate Platform to Develop APIs

- Initial Configuration, training & setup so you are ready for success!
- Create APIs & Apps in hours from existing AS/400 PGMs or Logic
- Native no-code integration, not screen scraping
- High Performance

**Offered
via**

- Appliance
